

OSS 2016

PROGRAMME

- Research papers
- Industry papers
- Tool demonstrations
- Keynotes
- Panels
- Tutorials

12th International Conference on Open Source Systems

The **International Conference on Open Source Systems (OSS)** is the premier conference to present research results related to open source initiatives.

The goal of the Twelfth International Conference on Open Source Systems, **OSS 2016** is to provide an international forum where a diverse community of professionals from academia, industry and public sector, and diverse OSS initiatives can come together to share research findings and practical experiences. The conference is also a forum to provide information and education to practitioners, identify directions for future research, and to be an ongoing platform for technology transfer, no matter which form of OSS is being pursued.

30 May - 2 June, 2016
Gothenburg, Sweden

IMPORTANT DATES
